

Shamsiddin Nabiev

Senior Software Engineer · Java / Real-Time Data

shamsiddin@live.ru | [linkedin.com/in/nshamsiddin](https://www.linkedin.com/in/nshamsiddin) | github.com/nshamsiddin | Dublin, Ireland

5+ years building real-time, cloud-native data platforms — Apache Flink stream processing on AWS, with full-stack and observability depth. Two MSc degrees (Software Engineering, AI).

Skills

Languages	Java (expert), TypeScript / JavaScript, Python, SQL, Bash
Streaming & Messaging	Apache Flink (Managed Flink / KDA), Apache Kafka (MSK), Amazon Kinesis, change-data-capture, event-driven & serverless
Backend	Spring Boot, Node.js, DynamoDB, MongoDB, REST APIs
Cloud & Infra	AWS, Terraform (IaC), Docker, Kubernetes, Jenkins, Spinnaker, CI/CD, Linux
Observability	OpenTelemetry, Dynatrace, distributed tracing, metrics
Frontend & Testing	React, Svelte; JUnit 5, Mockito, JaCoCo

Experience

Senior Software Engineer — Autodesk Apr 2026 – Present · Dublin

- Design and operate **Apache Flink** streaming applications for a real-time **change-data-capture (CDC) data platform** on AWS (Managed Flink, **Kafka/MSK**, Kinesis), powering producer and consumer pipelines across the org.
- Led **full-chain distributed tracing** with **OpenTelemetry and Dynatrace**, propagating trace context through Flink operators to close observability gaps and cut incident-diagnosis time.
- Contribute reusable connectors, operators, and instrumentation to **shared Flink platform libraries** used across multiple producer/consumer applications.

Software Development Engineer — Autodesk Dec 2021 – Apr 2026 · Dublin

- Built high-throughput streaming pipelines in **Java on Apache Flink**, integrating **Kafka (MSK)** and **Amazon Kinesis** for real-time change-data-capture and delivery.
- Authored **Terraform** infrastructure-as-code for Managed Flink and Kafka; owned **CI/CD** via Jenkins, Spinnaker, Docker, and an internal Kubernetes platform.
- Developed a **Spring Boot control-plane service** orchestrating Kafka resource provisioning (backed by DynamoDB), plus event-driven **Node.js** services and **React/TypeScript** front-ends.
- Diagnosed and fixed production issues in **stateful streaming jobs** (serialization, checkpointing, performance); maintained rigorous test coverage with JUnit, Mockito, and JaCoCo.

Software Engineer Intern — Autodesk Mar 2021 – Nov 2021 · Dublin

- Built full-stack features with **Java, Spring Boot, Node.js, React, and Svelte**; created modular Node.js services and used Docker and Jenkins for streamlined delivery.

Software Developer — VEON Aug 2018 – Aug 2019 · Tashkent

- Built **microservices and full-stack applications** with Node.js, Spring Boot, and MongoDB, collaborating cross-functionally on design, implementation, and integration.

Data Platforms & Billing Systems — VEON Nov 2015 – Jul 2018 · Tashkent

- Delivered **big-data analytics and targeted-marketing platforms**; administered mission-critical **billing systems** with Bash, SQL, Perl, Python, and Oracle SQL on Linux, automating tasks and resolving performance issues.

Education

MSc, Computer Software Engineering — Maynooth University	2020 – 2021
MSc, Artificial Intelligence — University of St Andrews	2019 – 2020
BSc, Computer Engineering — Politecnico di Torino	2011 – 2015
