

Shamsiddin Nabiev

Senior Software Engineer · Java / Real-Time Data

shamsiddin@live.ru | [linkedin.com/in/nshamsiddin](https://www.linkedin.com/in/nshamsiddin) | github.com/nshamsiddin | Dublin, Ireland

5+ years building real-time, cloud-native data platforms — Apache Flink stream processing on AWS, with full-stack and observability depth. Two MSc degrees (Software Engineering, AI).

SKILLS

Languages	Java (expert), TypeScript / JavaScript, Python, SQL, Bash
Streaming & Backend	Apache Flink, Amazon Kinesis, Spring Boot, Node.js, event-driven & serverless architecture
Cloud & DevOps	AWS, Docker, Jenkins, Spinnaker, CI/CD, Linux
Observability & Data	OpenTelemetry, Dynatrace, MongoDB, Oracle SQL
Frontend	React, Svelte, TypeScript

EXPERIENCE

Senior Software Engineer — Autodesk Apr 2026 – Present · Dublin

- Design and operate **real-time stream-processing pipelines on Apache Flink** for Autodesk's cloud data platform (AWS), instrumented end to end with **OpenTelemetry and Dynatrace** for full-chain observability and faster incident diagnosis.

Software Development Engineer — Autodesk Dec 2021 – Apr 2026 · Dublin

- Built high-performance, cloud-native services in **Java, TypeScript, and JavaScript**, developing **real-time data pipelines with Apache Flink and Amazon Kinesis** for scalable event processing.
- Developed event-driven **Node.js** modules and **React** front-ends, emphasizing modular, maintainable code across the platform.
- Owned deployment and **CI/CD** across AWS, Docker, Jenkins, and Spinnaker for streamlined, reliable releases.
- Diagnosed and resolved production **performance issues**, improving reliability of high-throughput streaming workloads.

Software Engineer Intern — Autodesk Mar 2021 – Nov 2021 · Dublin

- Built full-stack features with **Java, Spring Boot, Node.js, React, and Svelte**; created modular Node.js services and used Docker and Jenkins for streamlined delivery.

Software Developer — VEON Aug 2018 – Aug 2019 · Tashkent

- Built **microservices and full-stack applications** with Node.js, Spring Boot, and MongoDB, collaborating cross-functionally on design, implementation, and integration.

Data Platforms & Billing Systems — VEON Nov 2015 – Jul 2018 · Tashkent

- Delivered and supported **big-data analytics and targeted-marketing platforms**; administered mission-critical **billing systems** with Bash, SQL, Perl, Python, and Oracle SQL on Linux, automating tasks and resolving performance issues.

EDUCATION

MSc, Computer Software Engineering — Maynooth University 2020 – 2021

MSc, Artificial Intelligence — University of St Andrews 2019 – 2020

BSc, Computer Engineering — Politecnico di Torino 2011 – 2015
